

## Determine your suitable bracelet length

With a measuring tape you can determine your optimal bracelet length. If you do not have your own measuring tape to hand, you can cut out and use the template on the left instead.

**Measurement of the wrist (cm)**

**Item size**

<b>13,5</b>	<b>XS</b>
<b>14,5</b>	<b>S</b>
<b>16</b>	<b>M</b>
<b>17,5</b>	<b>L</b>
<b>19</b>	<b>XL</b>
<b>21,5</b>	<b>XXL</b>

Example: If your wrist has a circumference of 15.5 cm, order a bracelet in size M

### Printing

Print the page. Be sure to check that the page is in the original size (100%). If necessary, deactivate the **adjust to page size** setting in the print settings.

### Cutting

Cut the tape measure along the dotted line and cut a slit in the intended place.

### Measuring

Place the tape measure around your wrist and insert the End through the slot. The paper should fit well.

### Determine size

The value next to the slot is the circumference of your wrist. You can use this value in the above table to determine the bracelet order size.
